

# Subject Index

- acoustic sensation 81
- activity 24
- activity coefficient 24
- adhesion 142
- aerosol V, 5, 95, 278
  - characteristic of medium 278
  - effect of radiation to evaporation 290
  - efficiency of scavenging by water drops 305
  - evaporation 280, 289
  - formation 278
  - growth 280
  - liquid aerosol 5
  - scavenging by falling water drops 304
  - solid aerosol 5
  - temperature of evaporating aerosols 290
- aggregation number 168, 173
  - determination of 173
  - fluorescence method 173
  - scattering method 173
- agricultural soil 275
- alcogel 275
- Alexander-de Gennes theory 231
- alkali atom 3
- alkaline earth 2, 3
- amphipathic 142
- amphiphilic 142
- animal cell 26
- atmospheric humidity 290
- atomic force microscope 25
- atomic polarizability 65
- atomizer 279
- attenuation 90
- Auger electron spectroscopy 87
- autocorrelation function 98, 99
  - general form 104
  - *see also* photon correlation function
- balance equation 137
- Bancroft's rule 245, 246
- basic cell 18
- Berthelot's principle 145
- Bethe network 264
- bilayer 20, 26, 164, 171
- bilayer vesicle 164
- binding of atoms 2
- bioaerosol 278
- biological cell membrane 20
- black film 238, 241
- body force 182
- Born repulsion 220
- Boltzmann factor or distribution 17, 185
- bond 2
  - among atoms 3
  - bond length 4
  - covalent 2, 3, 4
  - ionic bond 3
  - metallic 2, 4
- Brewster angle microscopy 25
- Brownian force 304
- Brownian motion 2, 32, 250, 278, 288
  - concentrated suspension 60
  - creaming speed 250
  - fractal 76
  - fractal dimension 78
  - particle distribution by diffusion 45
  - pathway 44
  - relation to diffusion 45, 47
  - rotational 52, 60
  - scattered electric field 95, 102
  - scattered light intensity 103
  - translational 43
  - two particles 62
- bubbles 236
  - bursting of bubbles 279
  - stability 236

- calcium 3
- capillary fluctuation 19
- capillary pressure 254
- capture of Brownian particles 300
  - capture efficiency 301
  - continuity equation 300
  - convection diffusion equation 301
  - efficiency 302
  - particle flux 300
  - stream function near a cylinder 302
- capture (collection) efficiency 292, 302, 305
  - cylinder (Stokes) 296
  - effect of inertia 297
  - effect of interactions 298
  - sphere
    - – potential 295
    - – Stokes 295
  - threshold inertial capture 298
- carbonate 133
- cathode ray tube (CRT) 86
- Cayley tree 264
- CCC (critical coagulation concentration) 221
